

# Update using Wifi

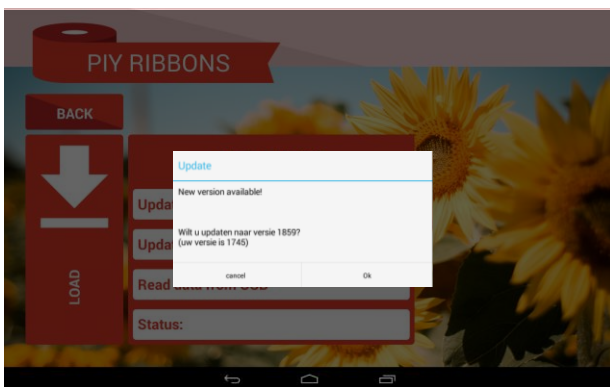

For this step, your PIY RIBBONS tablet needs to be connected to a Wifi network with internet access.

## Step 1

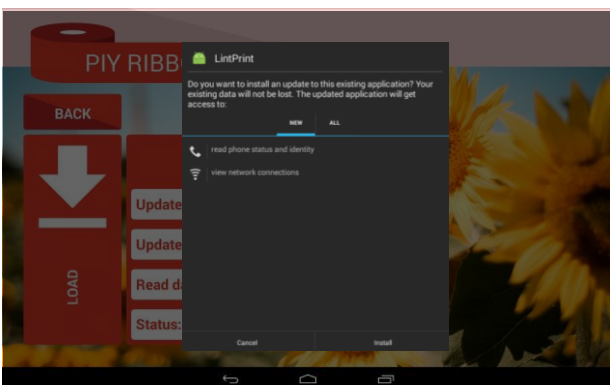

Go to LOAD in the MENU of the PIY RIBBONS app. Now click 'UPDATE APP USING INTERNET'. When the tablet is connected with the internet, the available update will be downloaded. You can follow the progress in the status bar.

When the download is finished, you will be asked to install the update. Click 'OK' to start.

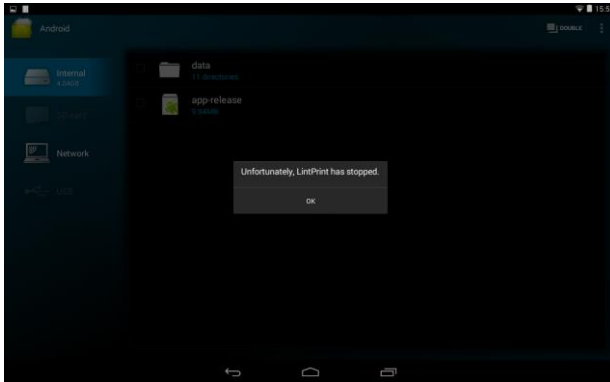

The screen as besides will be opened. Click 'INSTALL' to start.

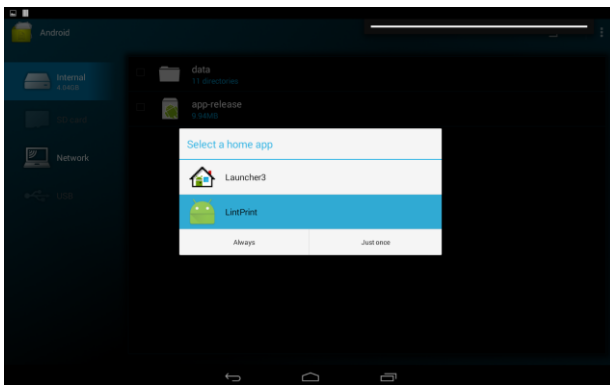

When the installation is finished, the PIY RIBBONS app will restart. In MENU > INFO you can check which version of the app is active on your tablet.

## Step 2

It is possible that installing an update causes the app to close and not start up automatically again.

The tablet will then show a screen as besides.

To restart the PIY RIBBONS app, click the HOME button (the pentagonal button in the center down of the screen). Following click 'LINTPRINT' and then 'ALWAYS'.

In exceptional cases it is possible that you won't get a notification, but instead see the screen besides.

Click the round button with six dots to show all apps. Choose 'LINTPRINT' to start the PIY RIBBONS app again.
